

SAGAR CHAVHAN

+91 7795905230 | cse.sagarchavhan@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience building scalable web and mobile applications. Proficient in TypeScript, React, Node.js, and GraphQL with hands-on exposure to AWS services (Lambda, S3, EC2, API Gateway). Experienced integrating AI/LLM APIs into production workflows and delivering end-to-end features including authentication, payment systems, and QR-based access control. Skilled in HPC and parallel programming (CUDA, OpenMP, MPI). Comfortable working in US-time-zone aligned shifts.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, HTML, CSS

Frontend: React.js, Next.js, React Native, Redux, Context API

Backend & API: Node.js, Express.js, GraphQL, REST APIs, FastAPI, Flask

Cloud (AWS): Lambda, S3, EC2, API Gateway, IAM, CloudWatch (learning / exposure)

AI / LLM: OpenAI API, LLM integration, Prompt Engineering, AI-assisted workflows

Databases & Tools: MongoDB, Firebase, Git, Razorpay, Pandas, NumPy

HPC: CUDA, OpenMP, MPI, Multithreading, SLURM, Linux

PROFESSIONAL EXPERIENCE

TicketsQue

Jun 2023 – May 2026

Software Engineer — Full Stack

Bengaluru

- Built end-to-end ticket booking platform using TypeScript, React.js, and Node.js with RESTful APIs and role-based access control.
- Designed and implemented GraphQL-ready API layer for event data queries, improving client data-fetching efficiency.
- Integrated Razorpay payment gateway for web and mobile transactions with webhook handling and order reconciliation.
- Implemented OTP-based authentication flows, user dashboards, and real-time ticket state management using Redux.
- Optimised app performance via lazy loading, code splitting, and component memoisation, reducing load time by ~30%.
- Explored AWS S3 for media storage and API Gateway for routing, with infrastructure scripting using Node.js.
- Integrated AI-assisted features using LLM APIs to automate event description generation and support workflows.

Adihptham Private Limited

Jan 2022 – May 2023

Software Engineer — Frontend / Mobile

Bengaluru

- Developed the E-Amantrana digital invitation platform UI using React Native and TypeScript for cross-platform mobile.
- Implemented QR-code-based guest entry flow with real-time API calls and offline-tolerant scan handling.
- Built reusable, accessible component library that cut feature development time by ~25%.
- Collaborated with backend team to integrate REST APIs for real-time event data, guest lists, and RSVP management.
- Resolved rendering bottlenecks through component restructuring and FlatList optimisation on React Native.

KEY PROJECTS

TicketsQue — Event Management Platform

React.js · Node.js · TypeScript · MongoDB · Razorpay

- Full-stack SaaS platform with authentication, payments, QR-based entry, and multi-role dashboards.
- Applied performance best-practices (lazy loading, virtualised lists, efficient state management) for production scale.

ExamVault — Exam Preparation Platform

React JS · Next · JavaScript · REST APIs · MongoDB

- Full-stack Exam Preparation platform for Banking and SSC Aspirants with Live video lectures, notes, mock tests, and smart tools all in one place.

E-Amantrana — Digital Invitation Platform

React Native · JavaScript · REST APIs

- Mobile-first invitation and event management app with QR guest check-in and real-time backend sync.

CPU & GPU Power Monitoring — HPC Research

Python · CUDA · OpenMP · MPI · SLURM · NVML

- Benchmarked energy consumption on PARAM Utkarsh supercomputer using Intel RAPL and NVIDIA NVML.
- Automated parallel job scheduling and workload analysis with SLURM and Python scripting.

E D U C A T I O N

Reva University, Bengaluru

B.Tech — Computer Science & Engineering

Aug 2016 – Oct 2020
