Portfolio

SUMMARY

Frontend Developer specializing in React.js with 3 years of experience building responsive, high-quality web applications. Proficient in JavaScript (ES6+), Next.js, REST APIs, and performance optimization, with a focus on clean, maintainable code and excellent user experience

TECHNICAL SKILLS

- **Languages:** Python | C | HTML | CSS | JavaScript | TypeScript
- **Frameworks:** ReactJS | React Native | Next | Express | Redux | Context API | REST APIs
- **Tools & Libraries:** Git | Pandas | NumPy
- **Databases:** MongoDB

PROJECTS

TicketsQue - An Event Management Platform (React.js, Node.js, Express, MongoDB, Razorpay)

- Constructed dynamic and responsive interfaces using **React.js and Next.js**, enhancing user engagement.
- Designed and implemented **OTP-based login system** supporting email and phone authentication.
- Developed user dashboard displaying **purchased, upcoming, and previous tickets**.
- Integrated payment workflows using **Razorpay**, ensuring secure and seamless transactions.
- Reduced UI bugs and improved performance through **component optimization and lazy loading**.
- Wrote clear project documentation and technical reports for reproducibility and stakeholder clarity.

Adihptham – E-Amantrana – Digital Invitation Platform (React.js)

- Created interactive wedding and event invitation workflows improving user engagement.
- Enhanced QR-based guest access flow for seamless digital event entry.
- Improved UI performance and reduced rendering issues through component optimization.
- Delivered clean, maintainable code following modern React best practices.

Monitoring CPU & GPU Power Consumption using RAPL (Python, CUDA, OpenMP, MPI, Linux, RAPL, NVML, SLURM)

- Measured CPU and GPU power consumption in idle and workload states on the **PARAM Utkarsh supercomputer** using **Intel RAPL** and **NVIDIA NVML**, enabling accurate energy analysis
- Expanded and optimised parallel programs using **OpenMP, MPI**, and automated HPC workflows with **Linux and Python scripting** to improve execution efficiency.
- Implemented efficient job scheduling and workload management using **SLURM**, enhancing resource utilization and overall parallel computing performance.

PROFESSIONAL EXPERIENCE

1. TicketsQue

Software Engineer

Jun'23 – Aug'24

Bengaluru

- Developed and optimised end-to-end ticket booking flows, including user registration, secure login, and comprehensive user dashboards for purchased and upcoming tickets.
- Implemented seamless online payment processing and enhanced overall user experience through performance improvements, responsive design, and cross-browser compatibility.

2. Adihptham Private Limited

Software Engineer

Jan'21 – May'23

Bengaluru

- Built responsive UI for E-amantrana digital invitation platform using ReactJS, JavaScript, HTML, and CSS.
- Designed UI for E-amantrana digital invitation platform using React Native, JavaScript.

EDUCATION

Reva University, Bengaluru, India - Bachelor of Technology, Computing Science and Engineering.

Aug'16 – Oct'20

Coursework: Data Structures, Algorithms, Python, Machine Learning, DBMS.

CDAC, Bengaluru, India - Course, HPC AIML Certification Course

Sep'24 – Feb'25

Coursework: High Performance Computing, OpenMP, MPI, CUDA, Linux, SLURM, AIML.
